

## Tips to find and access content on your library app

- **Download All** - Rather than downloading each checked out title individually, the Download All function in the app enables you to download all checked out titles with one tap. From the menu, select CHECKED OUT. Then, tap the DOWNLOAD ALL button to download all checked out titles in the audiobooks, magazines, eBooks, or comics carousels so you can access them offline.
- **Hyperlink Search** - Save time and view more titles from a certain author, narrator, genre, or series with easy, one-click hyperlink search in the app and browser. Select any title to open its detail page. Then, click on the author, narrator, genre, or series name to display search results matching that selection.
- **Advanced Search** - If you're searching for something specific in the app or browser, Advanced Search enables you to find what you're looking for quicker by narrowing the results. You can search by genre, for example, to find something without knowing the author or title. From the menu, select audiobooks, magazines, eBooks, or comics and click VIEW ALL to display all results for that format. Then, tap FILTER to enter advanced search criteria.
